## Personal Profile

Full-stack Software Engineer and International Relations Scholar passionate about public sector digital transformation. Experienced in leading end-to-end development of civic and digital solutions that balance UX, business goals, and technical feasibility. I leverage technical expertise in the PERN stack to build innovative civic tech solutions that promote transparency and solve real-world community problems like housing advocacy and sustainability.

## Projects

### EcoScan+ | React Native, Expo, mapping, camera integration

- Engineered a smart city sustainability app to gamify civic engagement and encourage recycling participation.
- Implemented mobile-native features, including interactive mapping and camera integration for reporting environmental issues.

### StreetLens | React, [Node.js](#), Express, PostgreSQL

- Built a civic advocacy platform to curb rent abuse, implementing logic that flags administrative action based on reporting thresholds
- Designed a secure admin dashboard to facilitate the investigation and escalation of housing reports to local authorities.
